INVESTMENT STRATEGY

Lakehouse Capital's strategy for the Fund is to invest the majority of assets in a high conviction portfolio of typically 20 to 30 companies with expected long-term growth.

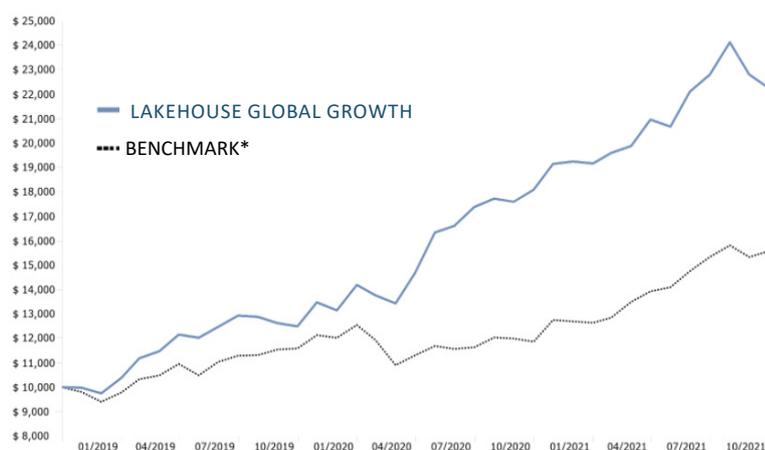

Our stringent investment process leads us to invest in companies that present the following characteristics:

- Strong positions in growing markets.
- Pricing power with customers and suppliers.
- Durable competitive advantages grounded in: scale, strong brands, network effects, or high customer switching costs.
- Aligned and experienced management teams with strong track records of capital allocation.
- Conservative balance sheets.
- Attractive valuations.

PERFORMANCE REVIEW & COMMENTARY

The Fund returned -2.5% net of fees and expenses for the month compared to 1.1% for its benchmark. The biggest contributor to performance during the month was **Sansan (+14.6%)**, which reported strong results with revenue up 25.4% for the quarter. Meanwhile, the largest detractor to performance was **MercadoLibre (-15.2%)**, which came under pressure due to the broad sell off in high growth companies on the back of concerns of rising interest rates. It is worth noting post month end they reported strong results which were well received. Elsewhere in the portfolio **Meta** (formerly Facebook), **Alphabet** and **Visa** all reported strong results with quarterly revenues up 33%, 41% and 29% year on year respectively. The Fund's largest sector allocations at month end were to information technology (32.7%), communication services (22.5%), and consumer discretionary (19.4%).
