DECEMBER 31, 2023

## ABOUT THE FUND

The Lakehouse Small Companies Fund invests in fast growing small companies listed in Australia and New Zealand. They are companies that are typically less researched, and have greater potential upside.

## INVESTMENT OBJECTIVE

The fund's objective is to outperform the S&P/ASX Small Ordinaries Accumulation Index over rolling 5-year periods (after fees and expenses but before taxes).

\* Performance calculations are based on exit price with distributions reinvested, after fees and expenses, since inception in mid-November 2016. Returns greater than one year are annualised. Past performance is not indicative of future returns.

\*\* Benchmark: S&P/ASX Small Ordinaries Accumulation Index.

## INVESTMENT STRATEGY

Lakehouse Capital's strategy for the Fund is to invest in a high conviction portfolio of 15 to 30 small companies listed in Australia and New Zealand. The investible universe consists of companies outside the S&P/ASX 100, though the Fund may continue to hold companies that grow into the ASX 100 as letting winners run is part of the Fund's long-term strategy.

Our stringent investment process leads us to invest in companies that present the following characteristics:

- Strong positions in growing markets.
- Pricing power with customers and suppliers.
- Durable competitive advantages grounded in: scale, strong brands, network effects, or high customer switching costs.
- Aligned and experienced management teams with strong track records of capital allocation.
- Conservative balance sheets.
- Attractive valuations.

## PERFORMANCE REVIEW

The Fund returned 5.4% net of fees and expenses during the month compared to a 7.2% return for the benchmark. Since inception in mid-November 2016, the Fund has returned 11.4% p.a. compared to 6.4% p.a. for the benchmark. The Fund's most significant contributor to performance during the month was **Pinnacle Investment Management (+14.2%)** reflecting the positive market sentiment. The management continue to improve the business, diversifying exposure into different asset classes and laying the pipes to strengthen distribution. The biggest detractor was **PEXA (-7.4%)**, following its recent trading update. The commercial efforts of the Digital Growth and International segments are behind schedule, as economic conditions extend sales cycles and UK refinance volumes track softer than expected.

## FUND COMMENTARY

The sector-level portfolio breakdown provides further context on the Fund's strategy relative to the broader market for small companies. The Fund's largest sector allocations remain information technology (**39.4% of total capital**), healthcare (**19.9%**) and Financials (**17.0%**) while the benchmark's largest allocations are to materials (**23.9%**), consumer discretionary (**17.4%**), and real estate (**12.5%**).

The Fund embraces a differentiated approach with an emphasis on capital-light, recurring-revenue-centric business models and a bias away from cyclical, capital-intensive businesses. As a result, the Fund tends to be overweight IT and underweight materials, energy, utilities, and real estate.
